

PUBLIC GARDENS.

Cultural Institutions and Public Gardens create unique and memorable experiences. We help protect and enhance those experiences by identifying and understanding their unique risks and creating tailor-made insurance plans. We also have the expertise and knowledge to handle special situations that require extra attention and planning including Fine Arts Exhibits, Special Events and Children's Gardens.

For the past twelve years, Sharon Van Loon has worked closely with public gardens and cultural institutions across the country. She provides training and education, materials on safety and loss prevention, comprehensive risk management evaluations and customized insurance and risk management programs. Her goal is to help provide safe work environments and reduce the cost of risk. To learn more about our program, contact Sharon Van Loon at svanloon@bhsins.com
